## REMARKS

This application is to appropriate 35,000 acre feet of the waters of the Little Humboldt River for storage during the non-irrigation season.

Storage will begin October 1st and continue through March 31st. However the applicant recognizes the authority of the State Engineer that he may begin the irrigation season earlier or later because of the changes in climatic conditions and because of fluctuations in and to the waters of the said stream system.

If the irrigation season is started earlier or later by the State Engineer the storage is to conform and be made during the non-irrigation season.

The stored water will be used for irrigation and domestic purposes on lands owned by the applicant with a decreed right from the Little Humboldt River.
